On March 29, 2004, Toyoda Automotive Systems and Toyota announced a \$25,000 grant to sponsor a classroom at the Youth Emergency Shelter of Morristown, TN.

"We really appreciate the partnership approach that Toyota takes with their suppliers, especially with such programs as Community Connection, whereby they join with us to make a difference in our community," said Max Biery, President, Toyoda Automotive Systems. "We are pleased to be able to jointly sponsor a school classroom at the Youth Emergency Shelter to assist with the education of the youngsters at the shelter as well as other special needs children in our community."

"Community support is the backbone of the Youth Emergency Shelter and the generosity of Toyota and Toyoda Automotive is a prime example of this type of support," said Eddie R. Davis, Executive Director, Youth Emergency Shelter, Inc.

Toyoda Automotive Systems has North American operations in Morristown, TN and Greenville, SC. The Morristown facility, which has been supplying quality power steering pumps and hoses to Toyota since 1990, employs 580 team members and produces 2.7 million units a year.
