SWM-Georgia, L.L.C. and Toyota joined together to provide a \$15,000 "Community Connection" grant to The Boys and Girls Clubs of Northwest Georgia on May 2, 2003 in Dalton, Georgia.

The grant was used to purchase computers and other equipment for the new technology lab. "Through Toyota and SWM-Georgia's generosity to the community, the Boys and Girls Clubs of Northwest Georgia will be able to continue fulfilling its mission to inspire and enable all young people, especially those from disadvantaged circumstances, to realize their full potential as productive, responsible and caring adults," said Oliver Dorsey. The Dalton area club serves over 300 children. He believes the new lab will enable them to stay on the edge of technology and give them more opportunities in the future.

SWM-Georgia is an important Toyota supplier. The Dalton plant produces window regulators, door frames, hinges, and many other products. 95% of the products manufactured by the Dalton facility equip Toyota vehicles. SWM products are used in every Toyota model built in North America.
